DETAILED ACTION

STATUS OF PREVIOUS OBJECTIONS

The previous objection to the abstract is withdrawn in view of Applicant's submission of an abstract that commences on a separate page.

STATUS OF PREVIOUS REJECTIONS

The previous rejection of claim 13 under the second paragraph of 35 U.S.C. 112 has been withdrawn in view of Applicant's amendment to the claim.

INFORMATION DISCLOSURE STATEMENT

One (1) information disclosure statement (IDS) was received on July 30, 2008. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

The following paragraph has been inserted before the "Field of Invention" section of the specification.

CROSS-REFERENCE TO RELATED APPLICATIONS AND PATENTS

This application is a division of U.S. Patent Application Ser. No. 10/335,075, which is now U.S. Patent 7,211,101, issued May 1, 2007. This application is a national stage entry of PCT/US03/40812, filed December 17, 2003 and published as WO 2004/060169 on July 22, 2004.

The following sentence on page 2 lines 23-26 ("The methods ... an opening.") of the specification has been replaced with the following sentence:

The methods and apparatus disclosed in the above-mentioned United States Patent Application Serial No. 10/081,726, now U.S. Patent 6,623,510 issued on September 23, 2003, and United States Patent Application Serial No. 09/732,178, now U.S. Patent 6,719,777 issued on April 13, 2004, can be used to deploy the clips of the present invention to engage tissue and close or seal an opening.

The following sentence on page 5 lines 18-20 ("For example, ... to the present invention.") of the specification has been replaced with the following sentence:

For example, the configurations shown in United States Patent Application Serial No. 09/732,178, now U.S. Patent 6,719,777 issued on April 13, 2004, and United States Patent Application Serial No. 10/081,726, now U.S. Patent 6,623,510 issued on September 23, 2003, could be manufactured according to the present invention.

The following sentence on page 6 lines 3-6 ("The clips of the present invention ... incorporated by reference herein.") of the specification has been replaced with the following sentence:

The clips of the present invention may also be delivered using the apparatus and methods described in the United States Patent Application Serial No. 10/081,273, filed February 21, 2002 and currently pending, which is assigned to the assignee of the present application and the disclosure of which is incorporated by reference herein.

The following sentence on page 6 lines 6-9 ("Similarly, the apparatus and methods ... may be used.") of the specification has been replaced with the following sentence:

Similarly, the apparatus and methods disclosed in the United States Patent Application Serial No. 10/081,717, filed February 21, 2002 and now U.S. Patent 6,695,867 issued on February 24, 2004, which is assigned to the

assignee of the present application and the disclosure of which is incorporated by reference herein, may be used.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Peterson teaches forming an annular clip by machining a tube or sheet to form fingers, deflecting the fingers outward, and heat treating the clip in the shape of its final configuration. Miura teaches the austenitic transformation of nickel-titanium alloys. Peterson alone fails to teach or suggest the steps of providing a planar clip with outward-pointing tines, bending the tines such that they point inward toward the center of the clip, and quenching the clip so that it retains an inward configuration as claimed. Miura further fails to compensate for the deficiencies of the Peterson reference. Thus, the prior art of record does not teach or suggest the claimed invention.

.Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

CONCLUSION

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vanessa Velasquez whose telephone number is
